

## Blood Borne Pathogens

### **Bloodborne Pathogens Training**

**Course Description:**

The Bloodborne Pathogens awareness course includes information that will help students with their understanding of what Bloodborne Pathogens are, and how risks of exposure can be reduced for themselves and others. The program assists in satisfying the training requirements of the U.S. Department of Labor, OSHA Bloodborne Pathogens Standard. We will discuss methods of disease transmission, work practice controls, universal precautions, handling and disposal of contaminated items, and personal and protective clothing and equipment.

**Course Objective:**

This program will teach participants how to comply with the OSHA Bloodborne Pathogens Standard, which mandates control measures to reduce the risks associated with contracting various pathogens including Hepatitis B, Hepatitis C, HIV, and more.

**Course Length:**

2 hours

**Target Audience:**

- Medical Professionals
- First Responders
- Lab Workers
- Police, Fire Fighters, EMT's
- Managers and Supervisors who may be on a job site.
- Safety Administrators
- Employees who are First Aid/CPR trained
